New Jesco Catalog Details Monorail Low-Voltage, Quick-Adapt Track Lighting And Companion Wall Sconces

Glendale, New York, 2007 — Jesco Lighting, Inc. is a fast-growing manufacturer offering a comprehensive selection of contemporary, architectural, energy-efficient lighting fixtures for a broad range of commercial, institutional and residential applications. The company has announced availability of a catalog detailing the entire Monorail system of contemporary, low-voltage, flexible track lighting with companion wall sconces.

The full-color, 102-page catalog presents a thorough overview of the Monorail system, including its ingenious foundation element, the *Quick-Adapt* universal fixture-head mounting jack; the wide array of decorative pendant-style fixture options that are offered; and light accessories such as companion Jesco wall sconces. A table of contents page allows users to easily find what they are looking for, by product category.

The Monorail system catalog uses actual application and product photos, schematic illustrations and descriptive information. It presents Monorail as a durable, changeable alternative to traditional, more obtrusive, inflexible track systems with more limited light options.

The first section of the catalog details *Quick-Adapt*, a snap-and-twist fastening device that quickly and easily allows users to create a range of flowing, adjustable, fixture-head and pendant lighting designs. Remainder of the catalog is dedicated to covering 45 contemporary fixtures and options that can be specified to produce a range of subtle to dramatic lighting effects.

Jesco Announces New Monorail Catalog... page 2

Monorail companion wall sconces complement the track-mounted pendants and are highlighted with their own product information, application and product photographs. Information on other available Monorail lighting system components, such as transformers, power feeds and standoffs, is also provided. Monorail pendant lights are complete when ordered; they include the glass shades, sockets and lamps.
